

THERMOCOUPLE WELDER

Features:

- Both Foot switch and start button for weld trigger.
- Lamp Indication for charging status.
- Automated Welding Time.
- PVC Handle.
- Nose plier probe for ease of holding.
- Have a separate interface for equipment maintenance, calibration (if needed).
- NABL accredited calibration provided.

Technical specifications:

General information	
Dimension	270W x 280L x 240H in mm
Rated Power Rating	400 W
Rated voltage	230V
Enclosure material	Stainless steel
Weight	6.2Kg
Thermocouple welder	
Types	Suitable for type K/J/E/T/N/R/S/B
Initial charge time	Min 3 Minutes.
Carbon Electrode	Carbon contact
Weld cycle	Min 5 to 10 weld/min
